

Sunshine Autograph

according to Campell Stokes, for independent recording of sunshine duration in northern and southern equatorial zones from 0 to 40° and 25 to 60° respectively. The instrument consists of corrosion-resistant gunmetal brass, hammer dimple enamel finish, with high-grade polished glass ball. Sun radiation onto the glass ball effects focus on the opposite side. Due to high temperature at focus centre, the sun position is burnt unto heat-sensitive paper with time graduation. A circular bubble is located on the base plate allowing exact adjustment of the instrument.

Specifications :

Instrument Size	approx. 205 x 185 x 245 mm
Glass ball diameter	96 mm
Weight	5 kg
Accessories	1 set of recording strips (280 pieces for summer and winter and 100 pieces for spring/fall)
Order no.	
7.004	Sunshine Autograph 0-40°
7.004/2	Spare recording strips (1 set has 380 pieces for 0-40°)
7.004/3	Sunshine Autograph 25-60°
7.004/4	Spare recording strips (1 set has 380 pieces for 25-60°)
