

**WeatherLink Live** can live-stream data from up to 8 :

- Vantage Pro 2 Sensor Suites
  - Vantage Vue Sensor Suites
  - Sensor Transmitters
  - Other Davis Vantage transmitters
- to any device in your LAN (Local Area Network)

Data upload to WeatherLink.com via Wi-Fi

Access the data on any connected device at WeatherLink.com

- via your smartphone
- via your laptop
- via your home computer, etc.

with the WeatherLink app

Inside air temperature / relative humidity and barometric pressure sensors are built-in the instrument

## Highlights

- Stream live weather data over Wi-Fi to the WeatherLink Cloud: See updates on your smartphone as they happen when the phone and WeatherLink Live are on the same local network.
- Access and securely share your current data on WeatherLink.com and the WeatherLink app.
- Upgrade to Pro or Pro+ to archive and analyze your historic data.
- One WeatherLink Live can collect data from 80 and more sensors in up to 8 transmitters in any combination.
- Collects data from Vantage Vue and Vantage Pro 2 Sensor Suite weather stations, Sensor Transmitters, and Leaf Moisture & Soil Moisture Stations.
- Ask Alexa or Google Assistant about your weather.
- Never lose data: Internal auxiliary memory and redundant battery backup.
- Industry-leading transmission range of 300 m from transmitter to WeatherLink Live.
- Effortless setup.
- No Wi-Fi? No problem. Comes with Ethernet cable.
- Includes barometer, inside temperature/humidity sensor, AC-adapter and power cable, and optional Ethernet cable.

## Live data

WeatherLink Live goes beyond our industry-leading online data update rates. Use the WeatherLink iOS or Android app to watch wind gusts and direct changes as they occur. Connect to the same Wi-Fi network as your WeatherLink Live for real-time data updates.
