

THERMOPALM TP22

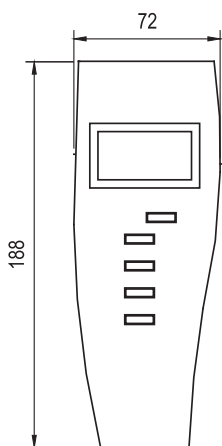

The TP22 is the ideal instrument for temperature measurements. With interchangeable Pt100 4-wire probes, it can be equipped for nearly every application.

Applications

Portable inspections in HVAC, random tests in the pharmaceutical industry, building management systems, museums, warehouses and many more.

Features

- Interchangeable Pt100 probes
- Operating range of electronics handheld: -10...60 °C / 0...100 %RH
- Measurement range: probe dependent, -100...600 °C
- Service interface (UART)

Order code	TP22
Probe type	Freely selectable from the complete range, 4-wire connection, page 16
Operating range of electronics	-10...60 °C, electronics / up to 600 °C at probe
Housing material	ABS
Power supply	9 V battery
Weight	Approx. 200 g

COMPATIBLE PRODUCTS

- All ROTRONIC temperature probes
- All Pt100 probes with 4-wire connection, Binder plug
- HW4 software, page 117

INCLUDED

- Short instruction manual
- Battery

TYPICAL ACCESSORIES

• Temperature probes, page 16	AC19xx
• Extension cable for probe, 2 m	AC1607/2
• Service cable	AC3006
