Vantage Connect:
Bringing Even the Most Remote Weather Stations "Within Range" with Cellular Updates

Real-time weather updates delivered right to your smartphone or computer.
Vantage Connect offers a new way to connect to your weather data. Now you can get real-time weather data from remote locations that may not have reliable power, but do have good cellular reception, without leaving your home or office. Vantage Connect works with both wireless and cabled weather systems.

Vantage Connect

Vantage Connect combines the data collection capabilities of a Vantage Pro2, Vantage Vue and Weather Envoy with cellular technology and an integrated data logger to transmit your weather data to a secure page on WeatherLink.com. View the data online using your computer or smartphone or download data to your PC for analysis, archiving and reporting using WeatherLink software (CD included). Vantage Connect can be configured to send you an immediate email or text message alarm when preset weather conditions, such as high wind or frost warnings, occur.

Partner Vantage Connect with a Vantage Vue ISS or any Vantage Pro2 ISS or additional transmitting stations (see page 13). Vantage Connect can either take the place of your console or work with your console to send your weather directly to the cloud. The cabled Vantage Connect installs using the 100 ft. (30 m) cable from a cabled ISS. Wireless

Vantage Connect has the same 1000 ft. (300 m) wireless range as our Vantage Vue and Vantage Pro2 consoles. You can connect an external temperature probe (6475 or 6477) to replace a wireless Vantage Connect's internal temperature probe (see page 16).

Vantage Connect is a self-contained, weather resistant, solar-powered unit that comes with mounting hardware, WeatherLink software and your own WeatherLink Network account (see page 19 for more information). Requires an annual service plan and one-time activation fee; see Annual Service Plan for details.

Radio compatible with Vantage Pro2 and Vantage Vue transmitters and repeaters (see pages 14–15). Solar-powered with battery backup. Computer system requirements: Windows XP or above. iPhone and Android compatible.

6620 Vantage Connect, 2G:GSM
6621 Vantage Connect, CDMA
6622 Vantage Connect, 2G/3G

Annual Service Plan

Hardware requires a one-time activation fee. Purchase of an annual service plan is necessary. Monthly subscriber fees depend on the frequency of your update interval.

CHOOSE YOUR PLAN (US ONLY)		
Update Interval	**Product Number**	**Annual Service Charge**
5 minutes	6632	Contact Dealer
15 minutes	6634	Contact Dealer
60 minutes	6636	Contact Dealer

See www.weatherlink.com for product service plan information and availability for customers outside of the US.
